PROFESSIONAL SUMMARY

Reliable, detail-oriented Virtual Assistant candidate with a strong foundation in administrative support, data entry, email and calendar management, and customer service. Fluent in English and Filipino, with excellent written and verbal communication skills, fast and accurate typing, and hands-on proficiency in Microsoft Office, Google Workspace, and remote collaboration tools such as Zoom, Slack, and Trello. A fast learner who is highly organized, tech-savvy, and comfortable managing multiple tasks independently in a fully remote, deadline-driven environment.

CORE SKILLS

Virtual Assistance & Administrative Support • Email & Inbox Management • Calendar & Appointment Scheduling • Data Entry & Record Keeping • File & Document Organization

Internet Research • Transcription • Customer Support & Service • Social Media Management • Written & Verbal Communication

Time Management & Multitasking • Attention to Detail • Problem Solving • Fast & Accurate Typing • Computer Literacy

TECHNICAL PROFICIENCIES

Microsoft Office Suite: Word, Excel, PowerPoint, Outlook

Google Workspace: Docs, Sheets, Slides, Drive, Gmail, Calendar

Communication & Meetings: Zoom, Google Meet

Team & Task Management: Slack, Discord, Trello, Notion

Design & Content Creation: Canva, Adobe Creative Suite

Web & Coding (additional skill set): HTML, CSS, JavaScript, React, Next.js, Node

RELEVANT PROJECT EXPERIENCE

Independent Web Development Projects | 2025 - 2026

- Managed end-to-end project documentation and organization for three independent web applications, keeping clear, well-structured records of requirements, progress notes, and technical details.
- Conducted thorough internet research to evaluate APIs, tools, and best practices before implementation, strengthening research and information-gathering skills.
- Organized project files and version history using Git and GitHub, reflecting strong file management and attention to detail.
- Documented and communicated project status and technical decisions clearly in written form.
- Balanced multiple concurrent projects and deadlines independently, demonstrating time management and self-direction in a remote working style.

Selected projects: Weather Application (React, JavaScript, OpenWeather API); Personal Portfolio Website (React, Tailwind CSS); Student Records System (React, Node.js, Express, MongoDB).

EDUCATION

Bachelor of Science in Information Systems | Northlink Technological College | Expected May 2029

Relevant Coursework: Web Development, Database Management, Data Structures, Programming

CERTIFICATIONS

- JavaScript Algorithms and Data Structures - freeCodeCamp, 2026
